

THE "TOOL ENCOUNTER" SCROLL

ALCHEMIST'S SUPPLIES

[Unstable Lab] The lab of Professor Wandbreaker [cookery old gnome] is going up flames as the spell components they were preparing for a new experiment were accidentally mixed. A character proficient with Alchemist's Supplies can attempt to stop the reaction and save the lab with a DC 15 Arcana check.

BREWER'S SUPPLIES

[Empty Keg] The Jolly Raven Inn is in trouble. They're only a few hours into their grand opening and are already short on ale. They have a cellar full of kegs, but they won't be properly aged for 2 weeks. A character proficient with Brewer's Supplies can speed up the process and save the party with a DC 14 Nature check.

COOK'S UTENSILS

[Ettin Stew] The stench of a pungent stew leads the party to the den of KirKraak, a temperamental ettin arguing about the last ingredient to add to their stew to make it perfect. A character proficient with Cook's Utensils can identify this ingredient with a DC 13 Nature check. On a failure, KirKraak's stew is ruined.

HERBALISM KIT

[Dying Goblin] The party discovers a goblin explorer who accidentally pricked themselves while coating their arrows with poison. They fell unconscious just as they pulled out their herb pouch to make an anti-toxin. A character proficient with an Herbalism Kit can finish the anti-toxin with a DC 14 Nature check.

PAINTER'S SUPPLIES

[Princely Portrait] While trekking through the forest, the party is approached by a vain fey prince who wishes to have a portrait painted of themselves. A character proficient with Painter's Supplies can attempt to do so with a DC 18 Performance check. On a failure, the prince is greatly offended by the lackluster painting.

TINKER'S TOOLS

[Kaboom] Running through the streets is a panicked humanoid construct whose self-destruct protocol was mysteriously activated and will detonate in 1d4 rounds. A character proficient with Tinker's Tools can disarm this protocol with a DC 18 Sleight of Hand check. With a 20+ they identify what activated the protocol.
