I hate those days. Why do I have to be at work whily most Scientist and other employees are at home...

Why do I have a shift with the most weird Nerd around? I never understand what he has to do here...

Miss Paligton?  
Would you come to my room please?

Gna...  
talking off..

Yes, Sir.  
Do you want to dictate...or anything else?

Thank you for asking, but I need case „B1MB3DNA“ please.

# DNA Re-written

Sir?  
Where are you?  
Doctor Sleipnut?

Seriously  
Typical Eggheads.  
He knew that he needs  
to sign that he got  
the doc...

...umen -  
Autsch!

# DNA Re-written

Ouuu...  
my head...feels so  
blurry...

Welcome back,  
Miss Palington. Glad  
to see that you wasn't  
that long away. Oh and  
don't even try...your arms  
are fixed. You can't move  
until the experiment  
was successfull..or  
not.

And before  
you ask: Yes, this  
experiment is allowed  
by the Management and yes  
I did not ask for your...permission...  
Glad that you are willing to help  
to test my new „DNA ReWri“  
module...for the glory of  
science and pleasure.

# DNA Re-written

That...pig!  
He will use me to TEST his  
new module? DNA ReWri?  
What is that...why  
aren't there...

Oh? You stay  
silent? Well okay...  
See, my colleagues and I  
have choosen you because  
you are an terrible secretary.  
We voted and your body and  
mind will be fixed so that  
you will become our  
hot SEXRETARY  
here.

My module is  
connected to the units at  
your wrists. They change any DNA  
to that what the Operator commands.  
Let's see...hm...yes. You are a petite, young  
woman, even in the Boobie department.  
I think some enhancement  
would be great?

Yes. You will be  
a proud owner of fake  
looking, 34 F Cup natural  
Breasts. And here they co...  
oh..before I forget Miss Paligton.  
It would help me if you can  
tell me later what do you  
feel as your DNA got  
rewritten, yes?

# DNA Re-written

YOU are  
SICK, Professor. You  
have no ... Oh my!

Hm...yes...I am very  
sick dear...but the Expansion  
for your Breasts? Nah...I have  
chosen the smallest cup size  
that was on my list... and look  
how fantastic your TITTIES  
are growing.

# DNA Re-written

Doc!  
They are fucking  
HUGE!

And you  
said that they should  
be natural but Fake looking?  
I can feel implant bags inside  
my breasts! Are you kidding?  
They are 100% Fake! Turn  
me back to normal  
immediately!

Oh yes! You are  
right, Miss Paligton. My  
bad...that must be a SIDE EFFECT of the  
Nanites I injected into your bloodstream. It seems  
that they could not understand the difference  
between „Fakelooking“ and „Natural“. No  
need to turn you back to normal.  
Soon that will be your  
normal self!

# DNA Re-written

You are kidding me, right? TURN ME BACK TO NORMAL! NOW! Or I will crush any single bone of yours as soon I am free!

Miss Paligton! No need to be that harsh. Your body change is allowed by the Management. Never read your contract? The fine print? But I get your words. We all are jealous about your toned body. You train a lot right? That is over. Your muscle mass will decrease to... let's say - 5%. You will be very weak Miss, I am not so sorry for that.

# DNA Re-written

Finally? Do you changed me enough? Want to remove that cuffs?

Yea I know. I can be very sarcastic, you know? But I truly have to say: You have delicate hands. You should have very long, curved fingernails, painted in glittered pink.

Sigh... why am I not surprised...

# DNA Re-written

I had no idea that also the pigments of something like Fingernails could be modified. Amazing! That open complete new perspectives.

# DNA Re-written

THAT ARE  
STRIPPER NAILS?! NOW  
I SEE WHAT YOU  
...

Gawd!  
With those Melons  
and Nails like those  
nobody will take  
me seriously!

# DNA Re-written

Professor!  
Please! Don't do this.  
When you are unhappy with  
my work, let me know  
what disturbs  
you...

And if I can't  
change the problem I will  
quit and you can hire someone  
new? But I don't want that  
body you are creating  
right now!

But...I see  
it clear in your eyes...  
You don't want to let  
me go, right?

No, we want let you  
go. We all here can't do that. No  
matter how much you use your absolute  
stunning rubyred HUGE, DICK SUCKING LIPS.  
Because we found out what  
you really are...

Yeah I know...  
I remember what you  
said before: A  
Sexretary?

No, that is what  
you will be soon. We found out  
why you really are here.

# DNA Re-written

You Mrs. Paligton  
are a spy. We found out that  
you shared a lot of intern and important  
informations with JinLinPing Corp...  
and we can't tolerate that.

Me? A spy?  
Never! I was always  
loyal!

# DNA Re-written

# DNA Re-written
