

## Harmonizing Melodies Exercise

### Section #1 - Chord Progression

The first step to harmonizing a basic melody is to establish the chord progression it is being played over. Using that information, we can find partials (alternative voicings that contain 3 or 4 notes) of those chords that are in proximity to the melody notes. Most commonly, the melody note will be the highest tone present in the chord shape, as we will see in section 3.

### Section #2- Basic Single-note Melody

### Section #3- Harmonized Melody
