

## **“The Pill” Classic Endings**

# **Belle’s Ending: Big Enough**

Lightly gripping your hand, Belle led you into the bedroom, the gentle sway in her hips accentuating her now perfect hourglass figure.

Laying down on the bed, she removes her top, allowing her supple breasts to sway freely.

“So...” she begins “not a bad purchase, right?”. You respond by straddling her, grasping one of her now bountiful bosoms in each hand.

Playing with her enlarged nipples, you notice discomfort on Belle’s face. Her new breasts seem to have come with a higher level of sensitivity that will take some getting used to. Though your body is consumed in the moment you make an effort to be more gentle on her fully erect nipples.

She smiles in relief and sexual gratification. Before long the combined movement of your thrusting and gentle tweaking sends her over the edge. You persevere, her smile widening as she realises you’re not done.

It turns out a simple pill can change a lot.

The future contains so much – shopping trips for new clothing to fit Belle’s expanded frame, perhaps exploring other options from the mysterious pill bottle and of course, more sex.

But for now, you both rest, buzzing with excitement and fulfilment in equal measure.
