# 06 LADY SIBILLA

## NMM

06/61

We start this fourth tutorial focusing on the NMM. Although I know that many times you use brown, blue and white to create the reflectance, this time we are going to give the effect that the metal is aged by the passage of time.

We start working with red to recreate the maximum light at the bottom.

# 06 LADY SIBILLA

## NMM

06/62

And we clean the area once we have done this first phase.

# 06 LADY SIBILLA

## NMM

06/63

Using this color, we mark the zone where the light is projected. And if necessary, clean the transitions or cuts that have been left.

# 06 LADY SIBILLA

Water

Carmine

Dead Red

## NMM

06/64

And now, let's look for that contrast through color (instead of using white). For example, we will use very intense colors to frame the lower part of this NMM. In this way, we will reflect that the light comes from below.

# 06 LADY SIBILLA

## NMM

06/65

Therefore, the key will be to play with these shades of red.

# 06 LADY SIBILLA

Water

Tenebrous  
Grey

Russian Green

## NMM

06/66

And in the upper part of our NMM, we are going to use complementary colors to that red, i.e. a desaturated green. This contrast between saturation (bottom) and desaturation (top), is what will reinforce even more the light that we have created in the lower part of the NMM.

# 06 LADY SIBILLA

## NMM

06/67

And we clean again the area using the same green that we have used in the previous layer.

# 06 LADY SIBILLA

## NMM

06/68

Then, we can introduce to our mixture a grayish color to begin to introduce texture and the outlines in light.

# 06 LADY SIBILLA

## NMM

06/69

2

If necessary, we will clean the area so that the transitions are not so marked.

# 06 LADY SIBILLA

## NMM

06/70

And now we introduce a gray to directly contain the effect of the NMM in very concrete points.

# 06 LADY SIBILLA

## NMM

06/71 **2**

And again, we clean the area.

# 06 LADY SIBILLA

Tenebrous  
Grey

## BRACELET

06/72

Play with the contrast of the complementary (red vs. green) and the light value (dark vs. light) and the temperature (warm vs. cold). These are three different values to generate the NMM effect. In the case of the bracelet, we are going to do it in a very simple way using the sculpture itself.

# 06 LADY SIBILLA

Water

Mix

Medium Sea  
Grey

## BRACELET

06/73

We work with those green colors that we have used before. And then we take it towards more grayish tones.

# 06 LADY SIBILLA

## BRACELET \_\_\_\_\_ 06/74

And then, we can introduce in the lower part a color that reflects the light.

1

# 06 LADY SIBILLA

Water

Medium Sea  
Grey

## BRACELET

06/75

2

And in the upper part, we will use a gray to create the same contrast that we did before.

Grey Green

Medium Sea Grey

## BONE

06/76

We will now move on to a more delicate section to represent a bone effect (and differentiate it from the NMM).

# 06 LADY SIBILLA

Mix

Medium Sea Grey

## BONE

06/77

Likewise, we have to take into account the light itself that is being reflected in the area.

Grey Green

## CROWN

06/78

3

Notice that we are adding texture, both in the area of the skull and the horns; it has been drawn in a very simple way.

1

2

# 06 LADY SIBILLA

Water

Mix

Medium Sea Grey

## CROWN

06/79

And for the crown, we are going to use a NMM. Although this time, using colors that are more brown. These browns will be more desaturated in the chest area to avoid drawing too much attention (i.e. we don't want it to be a focal point).

# 06 LADY SIBILLA

Water

Mix

Medium Sea Grey

## CROWN

06/80

And we will work on this occasion with grays with a little nuance (since the red loses strength as we move away from the light source).

# 06 LADY SIBILLA

Water

Medium Sea Grey

## CROWN

06/81

This is precisely a way to create gradients using that initial very grayish red. In this way we will be intensifying the light with the color.

1

# 06 LADY SIBILLA

## ARM

06/82

And now that we have worked on the light reflected on the metal, let's add some small glows.

1

# 06 LADY SIBILLA

## ARM

06/83

2

1

I don't want the area of the arm to be a focal point so its intensity will be lower.

3

# 06 LADY SIBILLA

Water

Mix

Middle Stone

## ARM

06/84

That is why we are going to work with brown colors to represent an aged or antique armor. In this way we will create a contrast between the skin reflectance and the aged armor.

1

2

3

# 06 LADY SIBILLA

Water

Tenebrous Grey

Grey Green

## ARM

06/85

2

And we can add texture by way of wear and tear (scratches or bumps).

1

3

# 06 LADY SIBILLA

## ARM

06/86

To reinforce the contrast (instead of using the NMM material itself) we can add light outlines to draw or limit each of the plates.

1

2

3

4

5

# 06 LADY SIBILLA

Water

Medium Sea  
Grey

Grey Green

## ARM

06/87

2

And because we are working with greys in the back area, we are going to work with a lot of saturation (to play with the contrast again).

1

3

# 06 LADY SIBILLA

Water

Medium Sea  
Grey

## ARM

06/88

3

And we begin to outline each of the plates that make up the fingers.

1

2

4

# 06 LADY SIBILLA

## ARM

06/89

3

On the other side, we will have to make the effect that the light is reflecting (i.e. that same intense eye color that we have used in the area of the chest).

1

2

4

# 06 LADY SIBILLA

## ARM

06/90

3

And again, we outline with reds and perform the same process that we have seen previously in the chest (i.e. intensifying the texture and outlines). I hope you liked this video, see you in the next one!
