

MINIATURE'S DEN PATREON GUIDES:

# URIEL VENTRIS

Blade and NMM Armor pt. 2

# WHY THIS MODEL?

I have painted a few Ultramarines for the Patreon but I've haven't done one in their iconic blue armor and this model caught my attention. It looked (and was) very fun to paint.

As always, this is part of my Twitch stream giveaway happening every month at [www.twitch.tv/miniaturesden](http://www.twitch.tv/miniaturesden)

# **PAINTS USED IN THIS GUIDE**

AK: Ice Yellow,  
Molotov: 208-lagoon blue  
Vallejo Model Color: Black

# OSL

This is going to be a shorter PDF guide as most of what I did for this OSL was very simple and used very little paints.

I started by shading the weapon in a "checkerboard" kind of way by adding VMC Black to Molotov 208-lagoon blue and glazed the resulting mix to slowly build up the shadow on the blade.

I then highlighted by adding AK Ice Yellow to Molotov 208 and, again, glazed to slowly build up the light on the blade.

When it comes to the armor, I kept it fairly simple by just adding a touch of VMC Black to Molotov 208 Lagoon Blue and used it to glaze down the sketched light from the previous guide so they would blend with the original dark blue basecoat

# THANK YOU!

I hope you enjoyed this guide on Uriel! If you haven't already, feel free to check out the video guides where I go much more in-depth in explaining my painting and the techniques used.

Thank you so much for supporting the Patreon and see you in the next guide!
