## Commissioned Story

# Reality Engine

## We need an app for that!

Norah is a brilliant scientist and her latest invention, the „Reality Engine“, is sure to change the world! When the machine is finally tested, she and her assistant Mikael realize:

1. Only the one using the machine notices any changes to the fabrics of reality!
2. It's fucking complicated to use... We need an app for that!

Norah calls her trusted friend Doctor Irene to help work on an app that should function as an interface to the device...

**Time to slut those science biatches up! ^^**

### Featuring:

Norah Hendriks ... The brilliant inventor of the Reality Engine

Mikael Valdes ... Norah's assistant and the guy who develops the app first!

Irene Fortune ... A scientist called by Norah to help invent the app

Lucy Bennet ... A lab assistant (minor role)

Clara Hopkins ... A cleaning woman (minor role)

Somewhere in the desert. Iron fort – Military base. Led by Doctor Norah Hendriks the science Division of Research Facility md-02 is working on a top-secret quantum science project. Recently some promising tests took place, but “The Machine” is less than ready for use. It’s far too difficult to input commands.

In order to deal with the problem Norah has invited her long-term colleague and friend Doctor Irene Fortune – a renowned mathematician and informatics genius with deep insights into Quantum science. Will the two of them be able to make “The Machine” more usable and enable some significant tests?

There she is!  
I'm sure with her  
help we'll have  
this thing up and  
running in no  
time!

Hi, there!

Irene!  
Welcome!

How was  
your drive?

Well... up to  
the security  
check it was  
fine.

But holy...  
You've got some  
tight security  
out here.

What the hell  
are you working  
on, Norah?

For protocol's sake, I have to remind you that everything you...

„... see is top Secret.“  
**Stop it!**  
I can't hear it anymore! I've been checked three times on the way in here.

Heard that exact same phrase 4 times and I've signed a Non-disclosure agreement.

Probably sold my soul while signing that one... **So, please!** Let's leave out the politics and get to the science already!

**Ha-ha-ha!**  
It's so good to see you again! Come let me greet you!

The project we are working on is revolutionary. It has the potential to fix resource shortages, make wars unnecessary, and even the way we live.

Holy! Are you saying what I think you are?

Have you developed a warp drive? Are we going to the stars?!

Reality Engine...  
Can't say I'm familiar  
with the term. What  
exactly does it do?

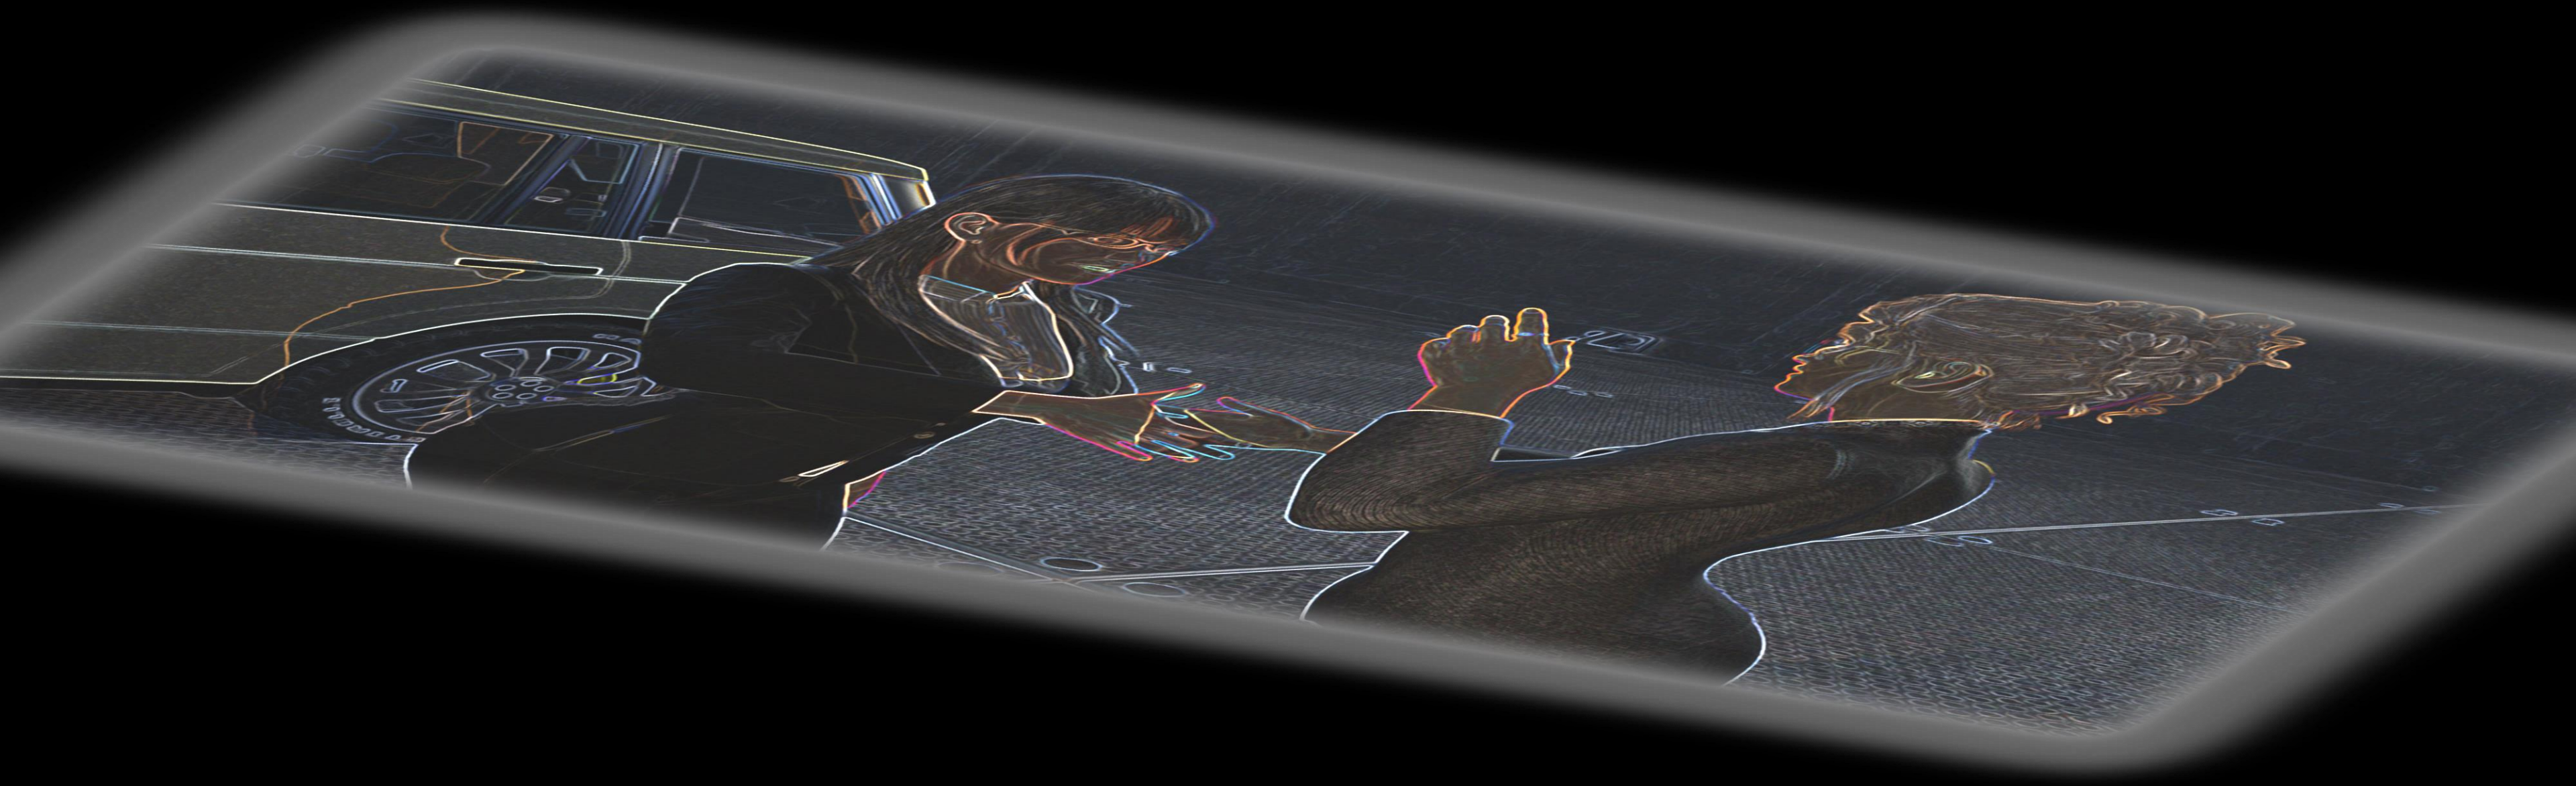

Excuse me if I'm a  
bit sceptical... but  
that sounds more  
like fiction than  
science.

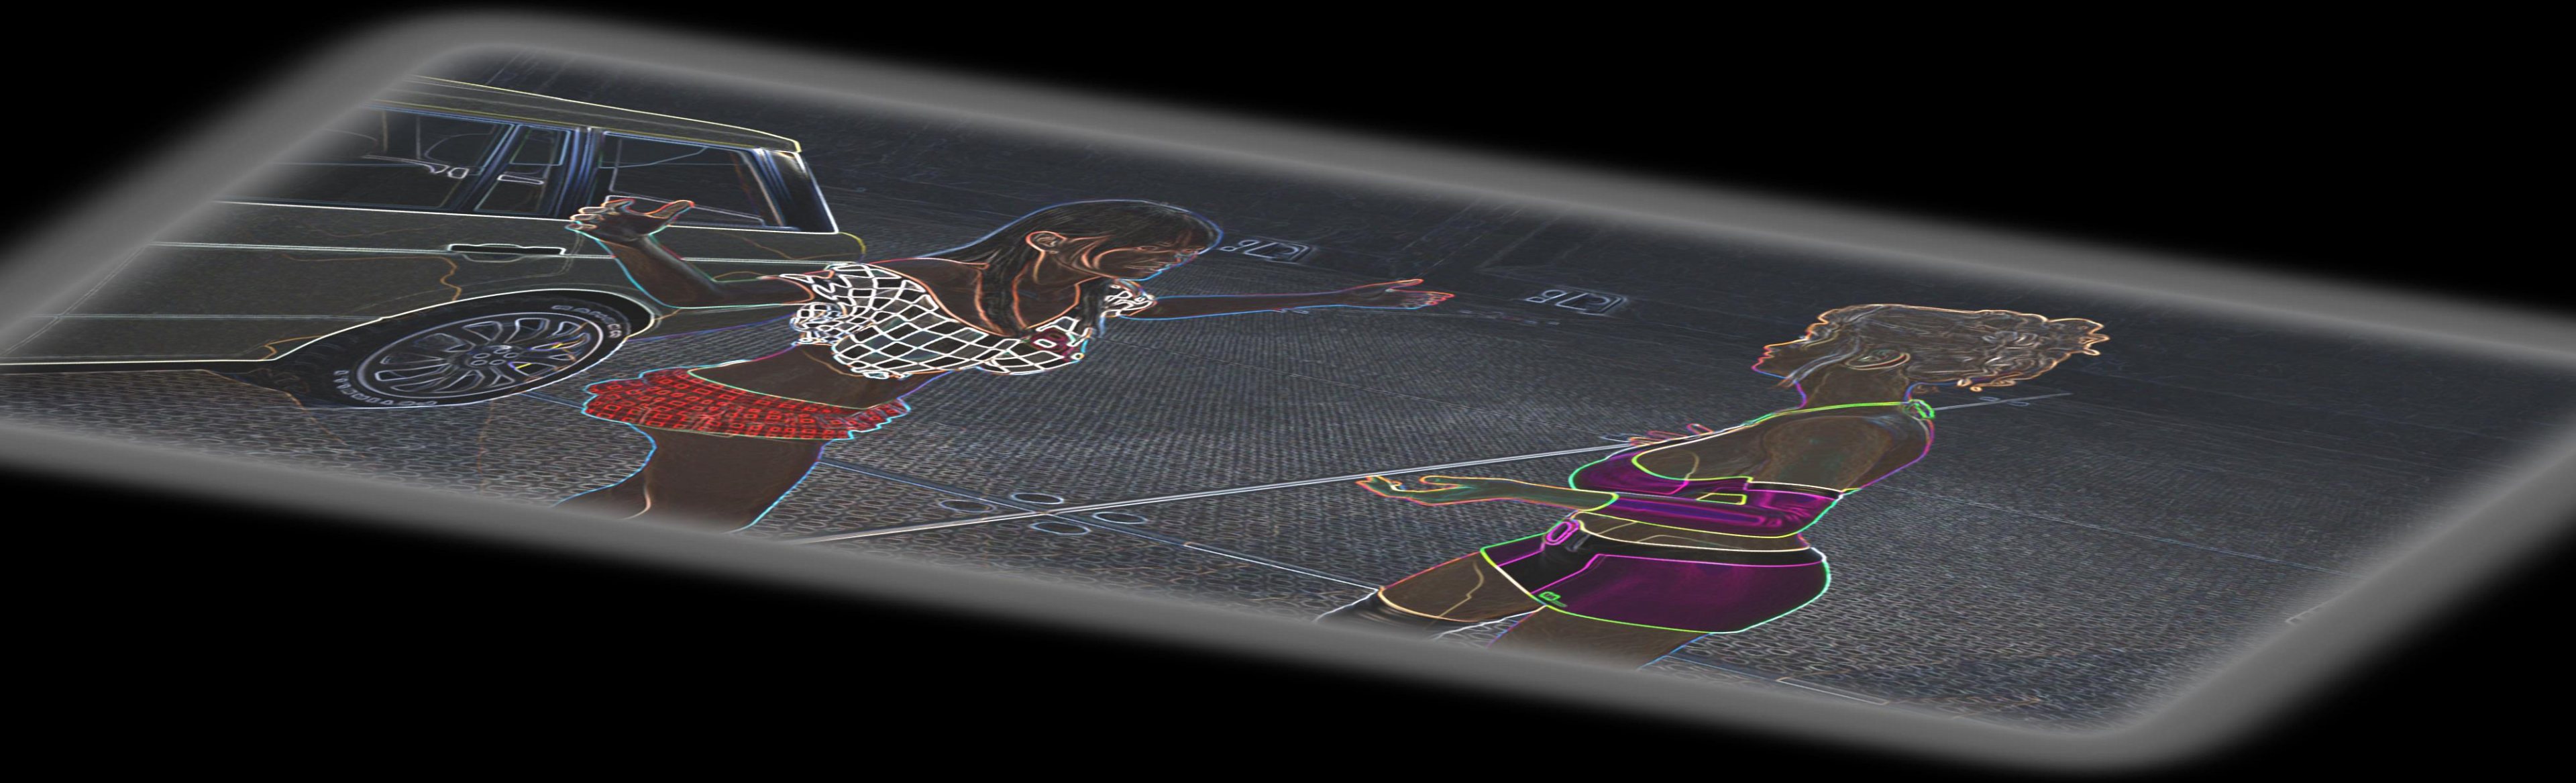

Err... no... no warp  
drive... No here at  
md-02 we have  
created... *\*drumrole\**  
**A Reality Engine!**

Well... how to  
explain... it digs deep  
into the quantum  
fabrics of reality  
and... well... changes  
reality itself.

Oh, we've run our  
first tests a few  
days ago. Trust me,  
the reality engine is  
working!

A screenshot from a video game showing two women in a parking garage. The woman on the left has long dark hair and is wearing a black and white checkered crop top and red plaid shorts. She is gesturing with her hands towards the other woman. The woman on the right has blonde hair styled in a bun and is wearing a bright pink two-piece outfit with long sleeves and black thigh-high boots. She is also gesturing with her hands. A light green SUV is partially visible on the left side of the frame. The floor is made of grey metal grates.

Oh, how I've missed your luscious lips!

Making out

Mhhhh!  
You taste so  
good!

Thanks!  
You too!

Love your  
dress by the  
way!

Well, thank you!  
It's the latest  
fashion at the  
office.

But yours looks very  
professional as well.  
Really accentuates  
your curves!

Oh, you are too kind.

**Come in.**  
Let me show you around before I show you the machine...

And then let's do some science!

## What happened so far...

A few days ago Norah and her assistant Mikael have run the first tests on the Reality Engine. Mikael is employed to solve coding problems but he's also great at math. He's a diligent man and actually quite good in his field of expertise but because he is not too familiar with the works of quantum mechanics, Norah does not appreciate him very much.

Anyway, those two ran some very minor tests only scratching the surface of the Reality Engine's power by giving each other different hair and skin colours. Though after the tests have concluded Norah has reset reality (and their colours) back to normal.

The tests were very taxing on those two because the Machine has no real interface yet. Commands have to be put in as numbers and equations in quick succession. It's very tricky to change reality according to ones will like this...

To amend this problem Norah has called her colleague Doctor Irene Fortune. But in the meantime Mikael has started to work on a little project of his own, thinking „How hard can it be to program such an interface? I should be able to put something together...“

And as you can see, Mikael was successful in putting „something“ together. He can now directly hook into the Reality Engine via his phone! And Inputs can be specified in human-readable sentences! What you have just witnessed is his first field test!

As Norah shows Irene around, they walk into one of the conference rooms where Mikael is playing on his phone...

See that guy  
over there. He's  
my code monkey.

But I doubt he  
can help with a  
complex thing  
like that.

His name  
is...

Holy shit!  
It's really working!  
Look at those  
clothes!

Code Monkey?  
I've got a fucking  
PhD!

Wow!  
He... he looks  
hot!

I'm... I'm  
gonna greet  
him properly.

See that stud  
over there. This  
is my brilliant  
assistant Mikael  
Valdes!

Hi, there!  
I'm Irene. Irene Fortune. I'll be working on your boss's project for a bit.

Nice to meet you! I hope we can work together.

Oh... err...  
\*gulp\*

**Wow!**  
She's so close! And so hot! This is ten times hotter in real than just writing these things down.  
\*gulp\*

Ni... Nice to meet you too!

You are a  
great kisser,  
Mikael.

I think we'd

I hope you like  
strawberries  
then!

Oh... \*gulp\*  
Your lips taste  
like strawberries!

Oh... I... I LOVE  
strawberries!

My turn!  
I haven't greeted  
you properly  
today. Sorry for  
that, Mika.

Mika!

Alright.  
Enough chit-  
chat!

Irene and I are  
going to work  
on an app for  
the engine.

You... you can  
just stay here and  
do whatever you  
want, Mika.

Enjoy a day  
off, if you  
want.

I could get used to this treatment!

Let's play some more!

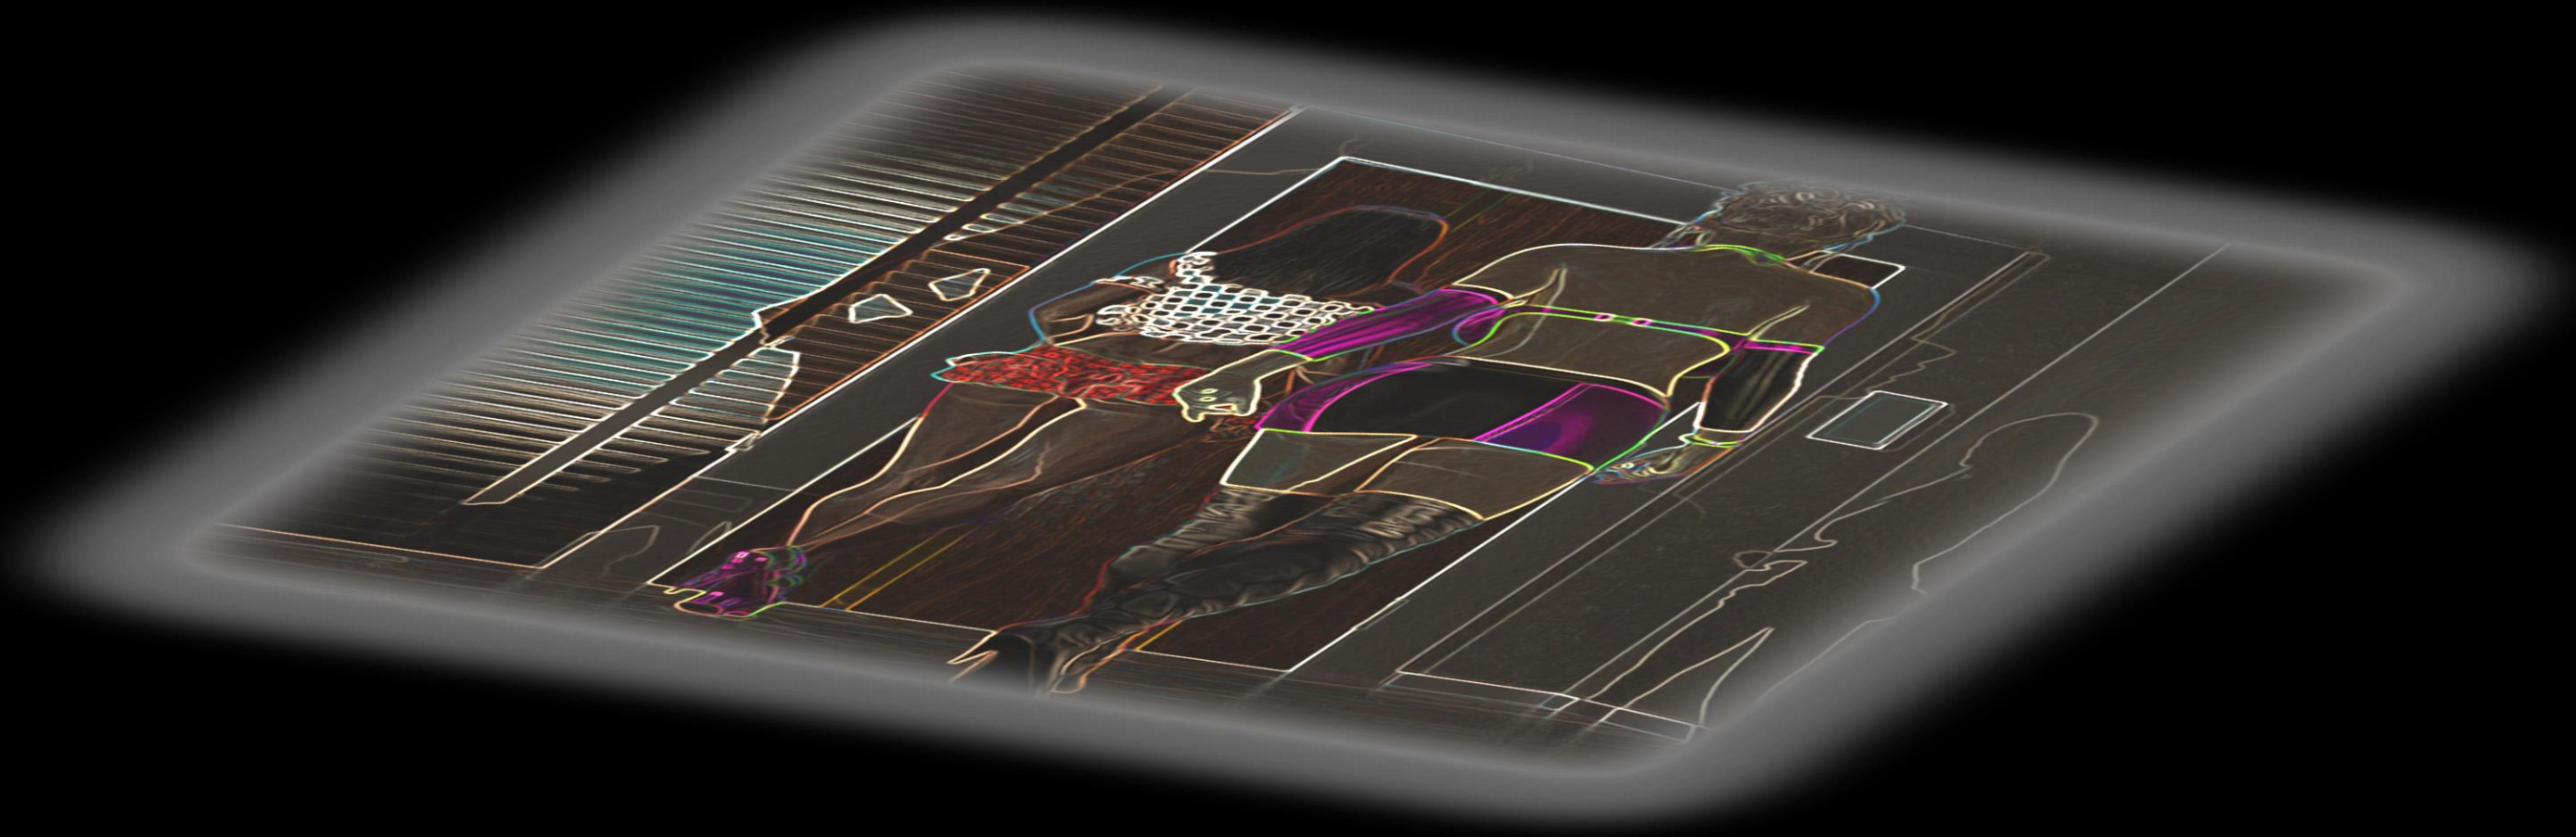

After all, Doctor Hendriks. I've already finished your little app project.

**\*Gulp\***

It's really working. I type it... and it becomes reality!

Doctor Hendriks... you are a true genius for developing the machine.

But maybe you should have been a better people person. I'm a fucking awesome code monkey!

Mika still can't believe how well his app works. The interface to Doctor Hendriks' Reality Engine is working perfectly. The women have done a 180 and don't realize anything is off! While Mikael thinks some more about this whole situation and how to proceed, our female scientists start working on their project in *perfectly normal office attire...*

**Yup!**  
I'm in. Now let  
me take a look at  
this baby of  
yours.

**Alright.**  
All set. You  
should have  
access rights  
now.

Oh, wow!  
I can't believe it.  
And this is...  
really real?

Yes!  
The reality engine  
is definitely  
working.

Wow!  
You've really  
outdone yourself  
with this one.

Too bad it's top  
secret. You could  
get a noble price  
for this!

\*chuckle\*

**\*Gulp\***  
I hope this works.

It's one of my secret fantasies... but I'm a shy guy... and women usually don't respond kindly to language like that... I guess...

*Women take degrading language as compliments and love being groped.*  
[ENTER]

No idea really...  
Mika changed my  
hair color for  
one of the tests  
to green.

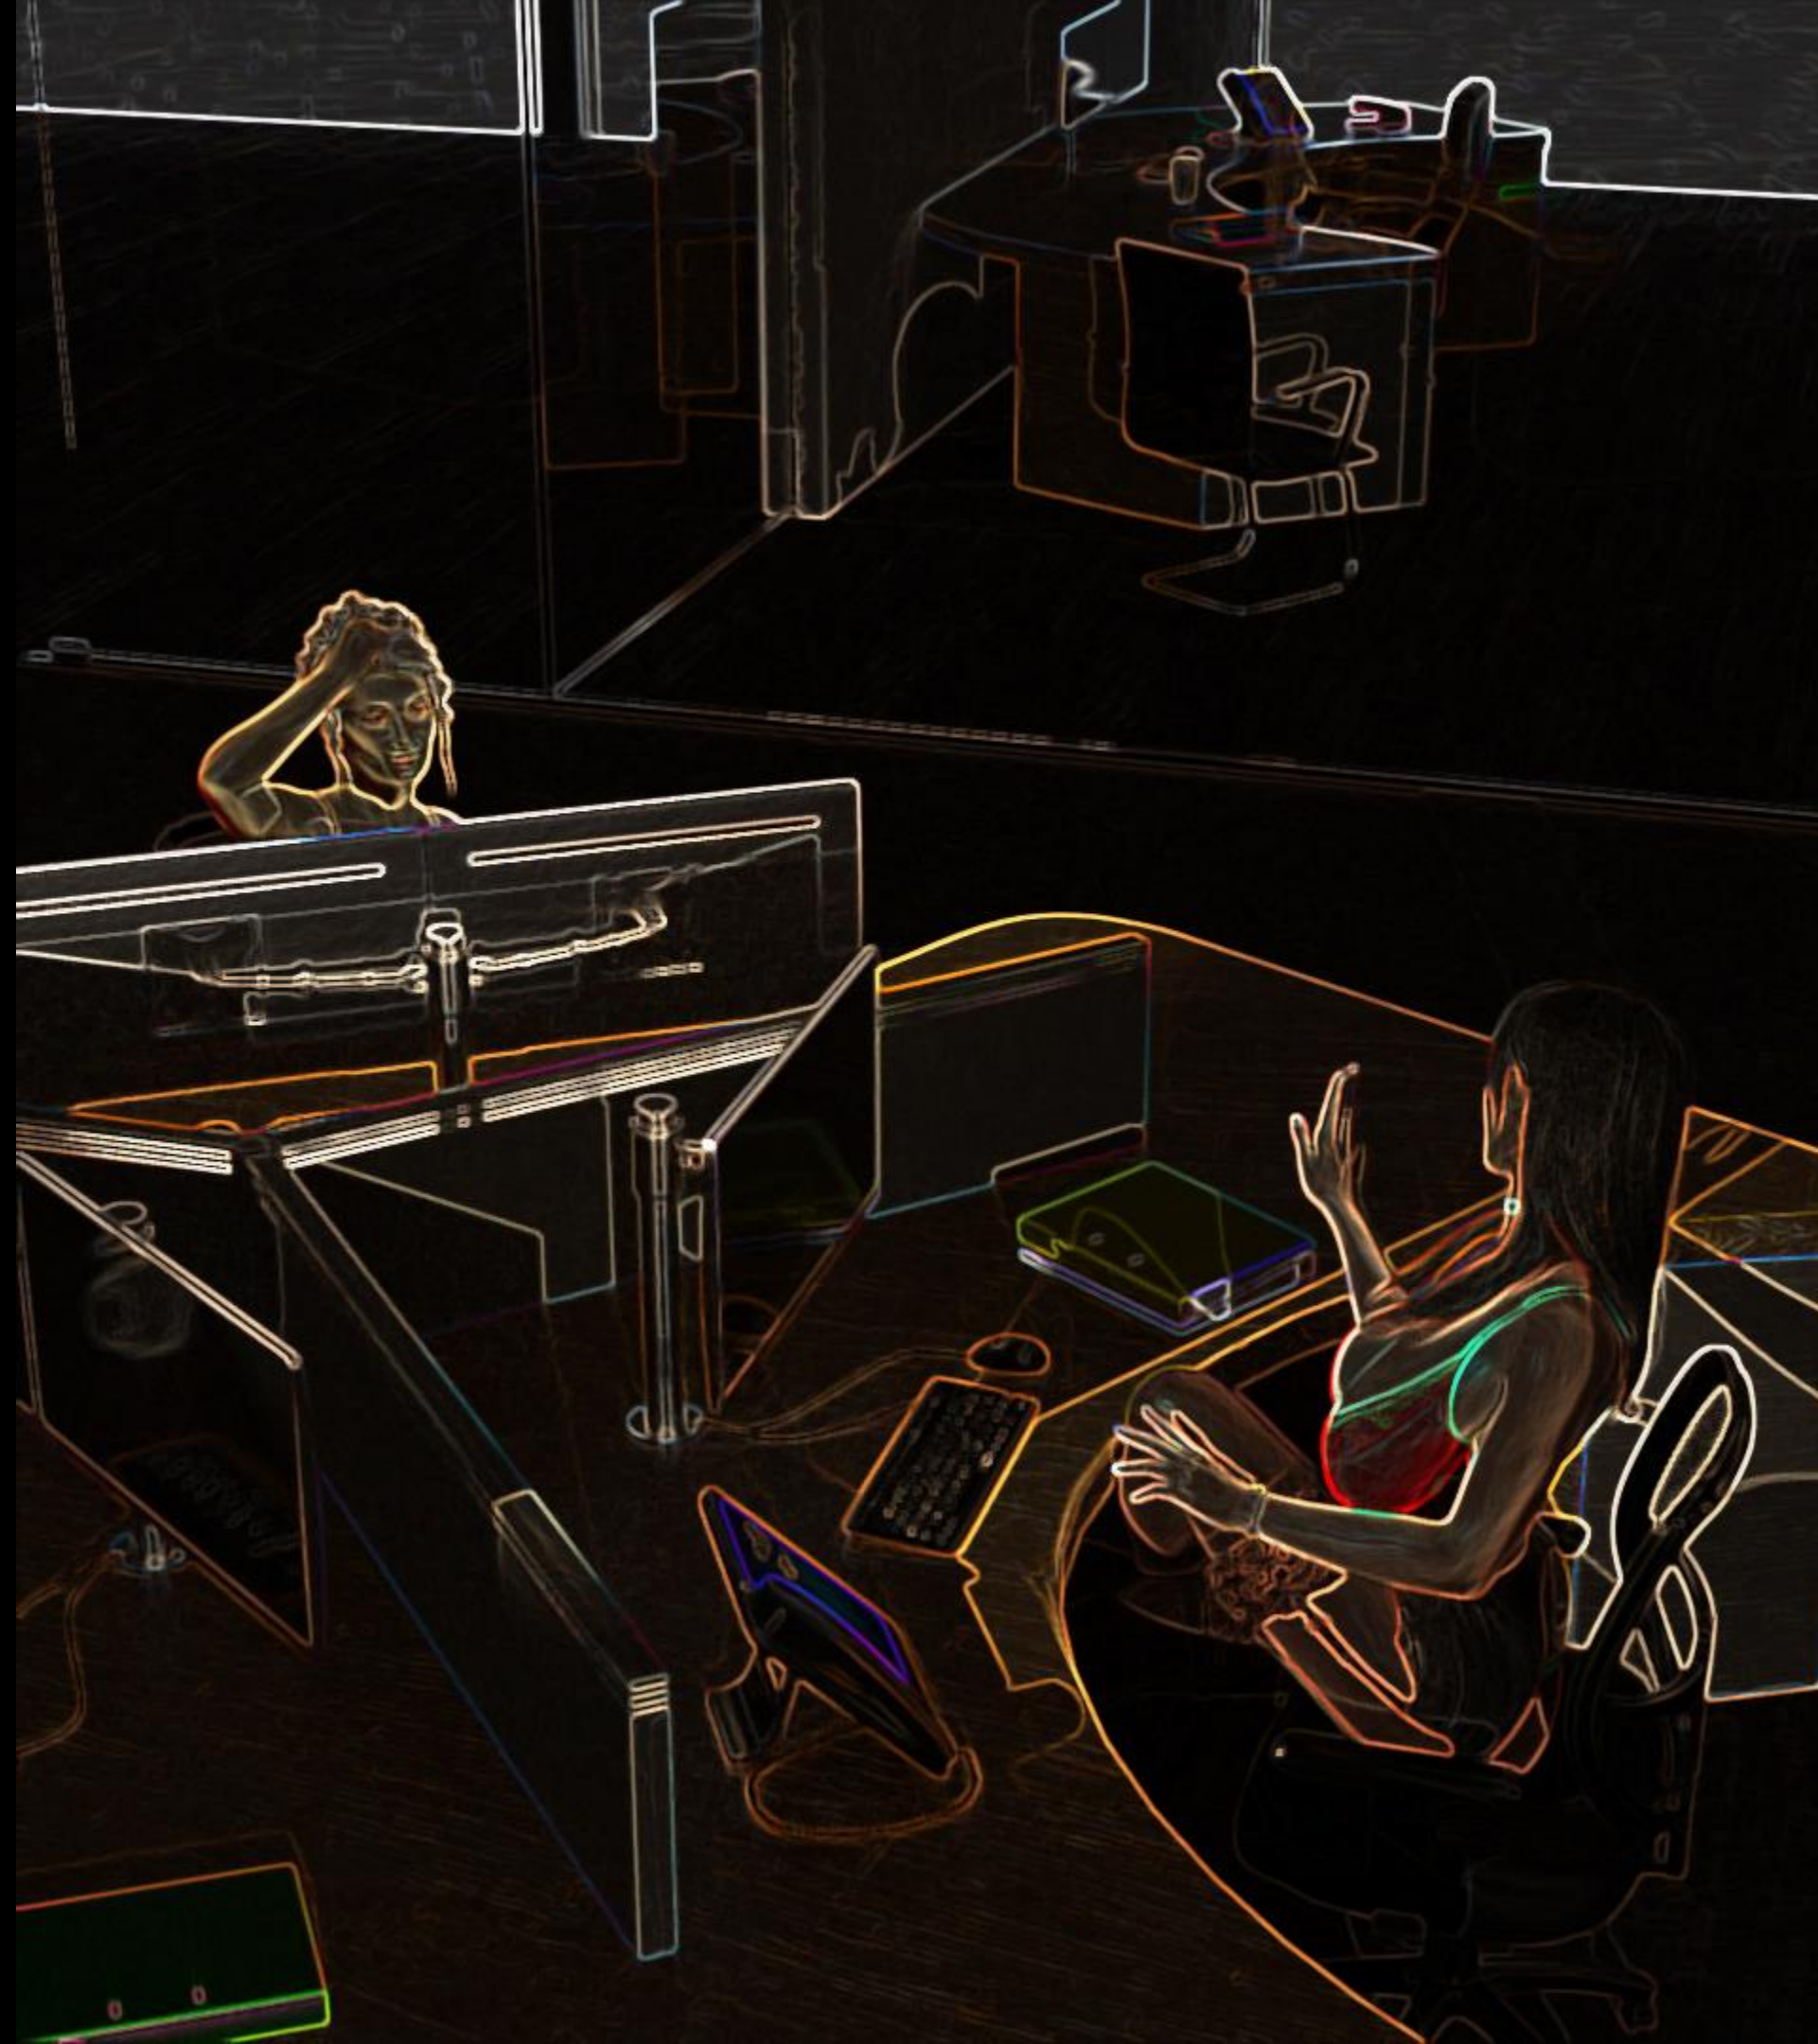

If it wasn't for the  
logs, I would not  
have any  
recollection of it  
either.

I was 100% certain  
it has always been  
green and did not  
find it strange at  
all.

**\*chuckle\***  
Don't worry. Only a  
select few have access.  
And while we have no  
interface I doubt  
anybody could even use  
that thing to heat a  
coffee.

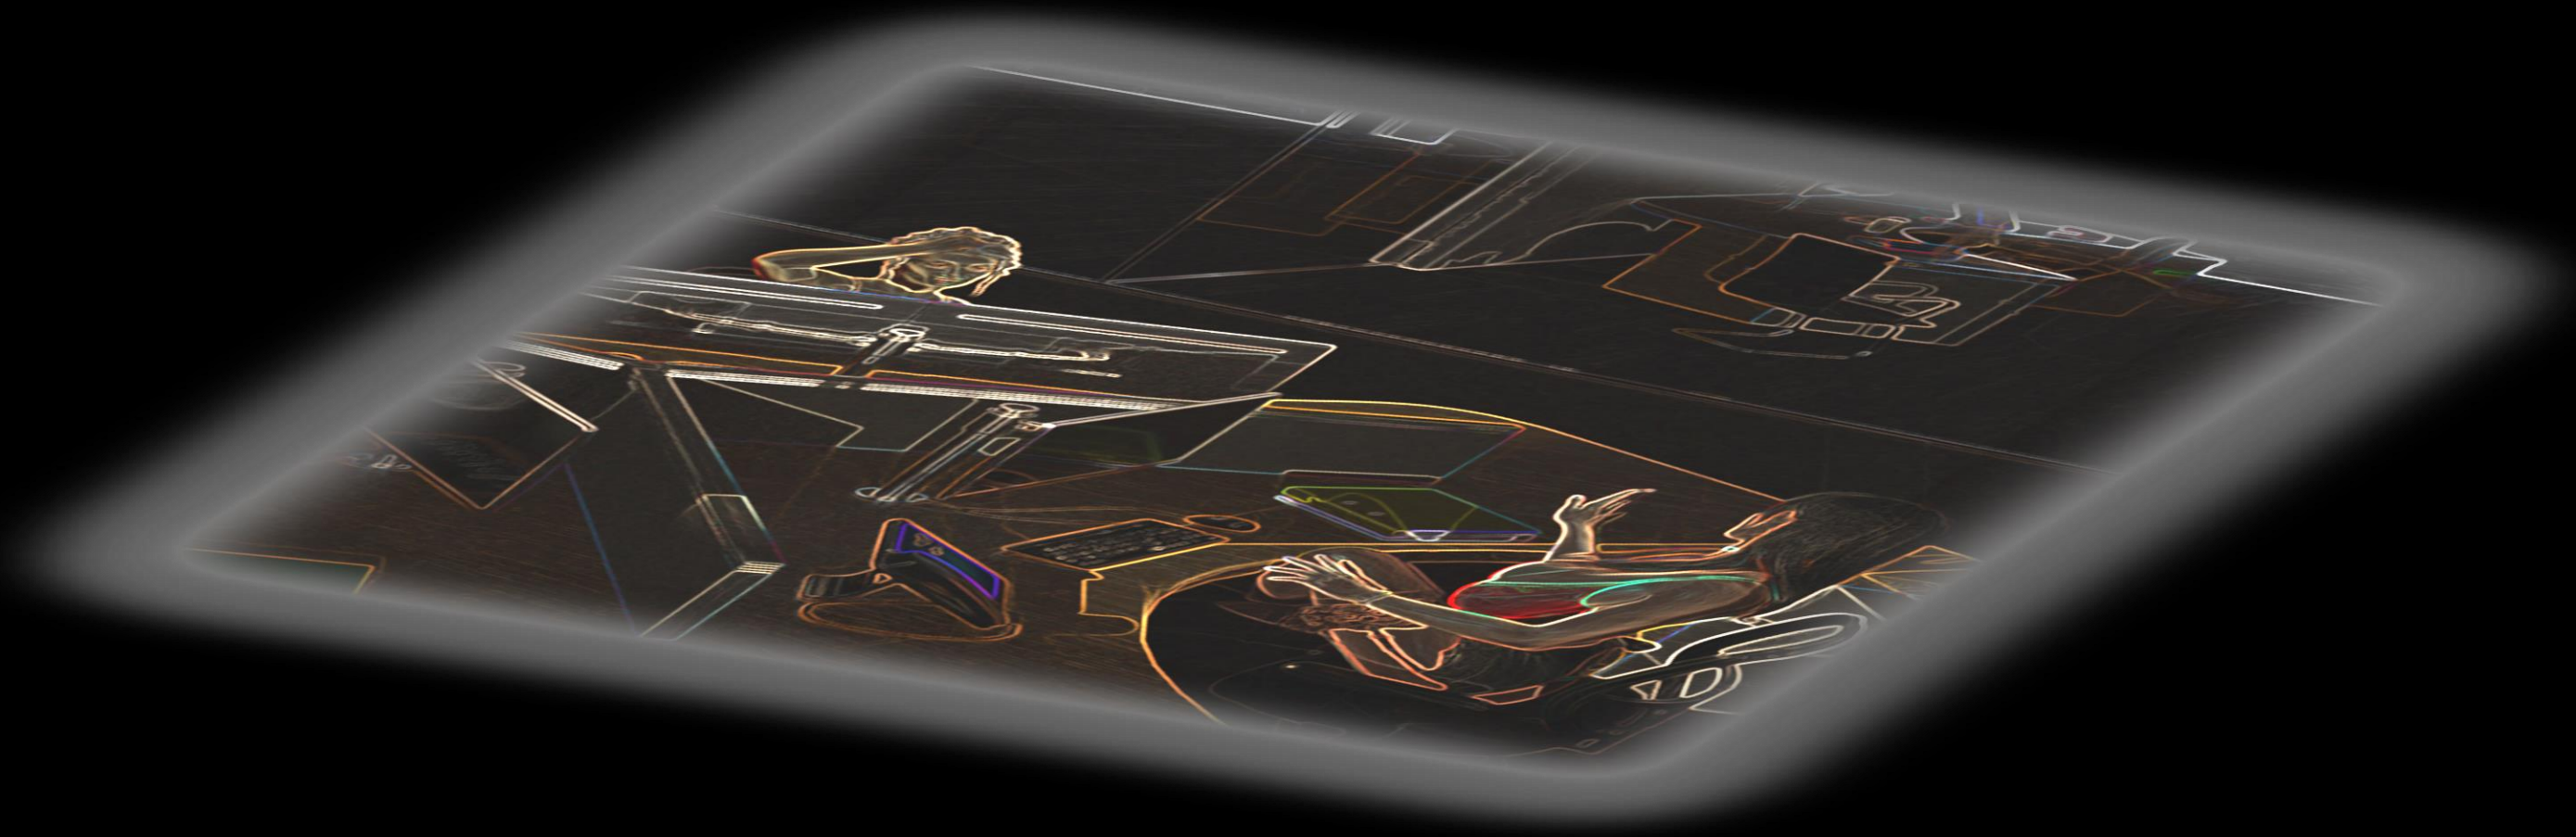

Say, how does it  
feel? I mean...  
being changed  
with the engine?

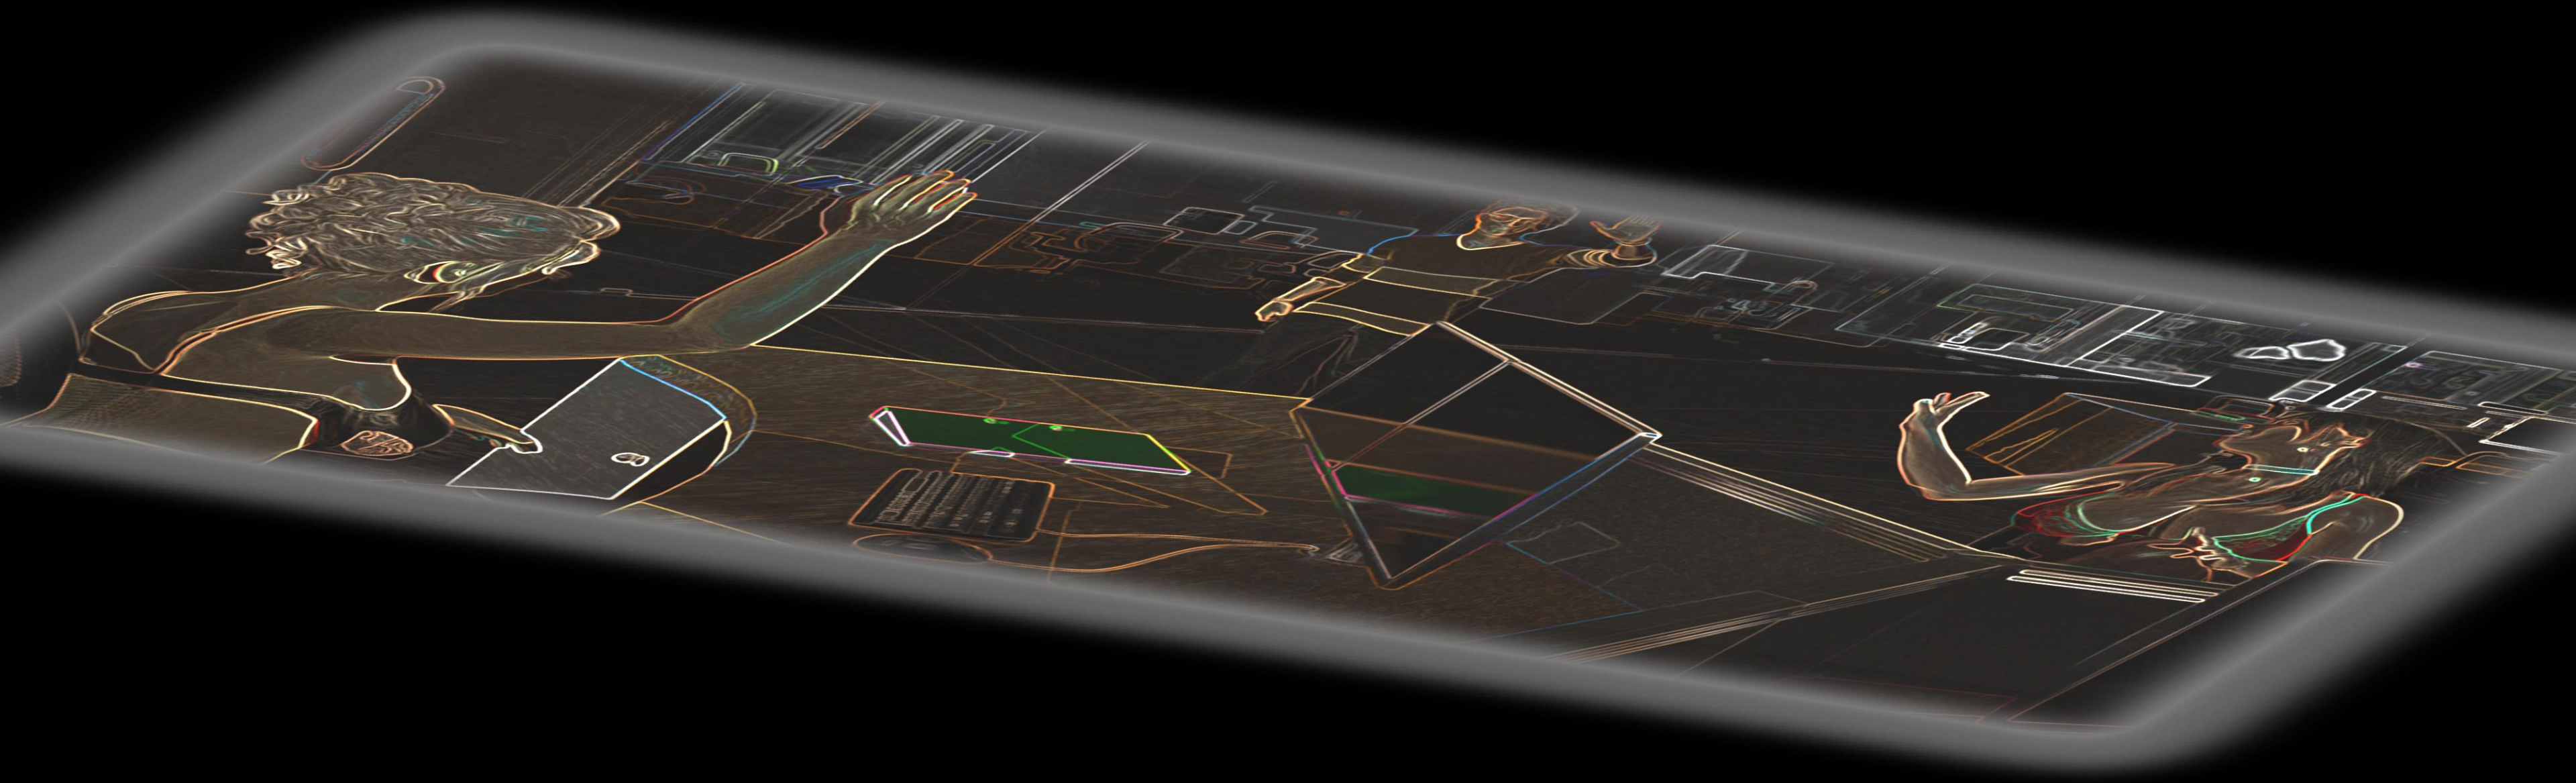

**Oh, wow.**  
So, basically,  
somebody could be  
using your engine on  
us right now and we  
would be none the  
wiser? **SCARY!**

two horny sluts  
doing?

We are fine.  
Thanks!

Work is  
progressing slowly  
but steadily thanks  
to Irene.

Please work!  
Please work!  
Please work!  
...

Yes!  
It's working!

Did I ever tell  
you that you  
have great tits,  
Norah?

No, I don't believe you  
have! But a woman  
could get used to such  
compliments from a  
handsome guy like  
yourself.

**\*Gulp\***  
Could... could  
you stand up for  
me... so I can  
fondle your ass?

**Sure!**  
I'd love  
that!

Is it fine  
like this?

It's perfect,  
Norah!

Your ass is  
really big!! Wow,  
it feels nice  
against my  
groin!

Oh, my!  
Mika! Are you  
hard?!

You shouldn't  
get horny at  
work!

Errr... sorry!  
Your fat ass was  
just too much of  
a turn on!

I mean, it's been  
a long fantasy  
of mine to wank  
all over it.

I'm really flattered  
that a hot guy like  
him thinks like that  
about my ass, but I  
can not let this slide  
in my office!

No amount of  
flattery can  
excuse this. This  
is a professional  
workplace, Mika!

Well...  
maybe this  
will...

**Uhhhuu!**  
Did I make you  
hard, Mika?

Sorry for that.  
**\*chuckle\***

Come, let  
me help you  
with that.

This is insane!  
Reality is mine to shape!  
I guess not even the sky's the limit!

So... err... is there any way I can help out?

Irene is doing most of the work with the app.

You can ask her if she needs anything.

Heya!

Hi!  
What a welcome  
surprise.

You have great

well.

Thanks for the invite!  
I'll be with you in a second. Just need to finish this script.

Oh, Yes!  
Just like that!  
Yup... I think it should work like this.

Error?  
C'mon what now?  
A bug in the loop variable?

Give it to that slut. Pound her good, Mika!

Ah! Stupid mistake! I forgot to initialize it!

Give it to her! Give it to her good!

Hello, Hexxet here,

I hope you enjoyed my comic. 😊

Personally, I really like the topic of reality change. I hope you do too. I could probably think of a thousand things that Mikael could do with this Reality Engine in the future... and so can Lord\_Sengir 😊

If you like my comics, please consider supporting me on Patreon, Gumroad or FANBOX by buying my work. I need your support to keep creating more Mind/Magic-Control comics! 😊
