

A few sections are marked for – Cheating/Cuckhold/NTR Content. There isn't much but there is some.

Keiko let out a yawn and a stretch as she continued reviewing the content on the computer screen once more. The report was hardly scientific, and if she was honest, it was a little boring and frustrating that she, the top scientist of the underwater lab, was dealing with it.

'I need to relax. This is... important. That drone was expensive, and if we don't report the incident immediately, someone from Tokyo will be very displeased.'

Still, the 42-year-old woman with a tall, slender build and nice large breasts were the Head Researcher for the Undersea Research Lab Alpha, commonly known as URLA Station. Her fields of expertise were supposed to be used with studying marine life, helping to map the unexplored ocean and so much more than *this*. At that moment, it felt like she was working in an insurance office, filing a claim for a million-dollar drone.

Keiko finished her report. 'We tried to get the drone to move again, but the damage incurred while exploring subterranean cave Gamma 3-2 proved extensive. It is too deep to send divers, but perhaps we can use a submersible for recovery.'

Signing off and stretching again, Keiko pulled off her hair bun and rolled her neck a moment before tying her dark-brown hair up again. Feeling relieved to have put that behind her, she closed the email tabs and went back to examining the scans from the cave. The drone may have been a loss, but it had recorded some data for her to dig into. Upon examination of the data, the attractive, mature beauty felt her body tensing up with sadness.

'This can't be right. Did the drone's scanners get corrupted before it crashed? None of these figures make any sense,' Leaning forward, her brown eyes reviewed the data again. Keiko focused on the strange readings so much that she barely noticed when the door into her office opened up. She had some faint notion that her daughter had come to check in on her, but it was actually a deep-blue-skinned being of some strange form. Slender with a smooth and featureless lower face, the peculiar humanoid's eyes focused on the female in front of it.

Raising a three-fingered hand slowly forward the woman ahead, the scientist rose from her chair.

"Hello," Keiko said warmly.

Oddly, no fear existed in her mind. The only thing occupying the Head Researcher was the knowledge that she hadn't attended to her physical needs in at least three days. 'My work is too important for such selfish pleasure. And it's the summer session; I have to continue my work and handle things like the drone report. I'm sure when I see Will again, we will... spend time...'

Keiko noticed her thoughts melting like bubbles in the ocean as she approached the stranger. Falling to her knees, she ripped open her lab coat and pulled her simple shirt up and over her head. Since she rarely wore a bra while working, the mysterious humanoid got a nice, good look at her still very firm tits after Keiko tossed her shirt on the floor. The creature could feel her excitement, and that made its cock rise up to its fully erect state. Smacking her lips lewdly, the woman with long dark-brown hair opened her mouth and began sucking on the big, long cock.

“Mmmrrruhaah.... Lrrrruuphh!” The sexual length tasted a bit like seafood in her mind, but its texture and the juicy slime it excluded had her fumbling to take more and more of him inside her mouth. Keiko felt the urge to play with her nipples, and soon, the milf found herself kneading the tired flesh of her nipples. As her pussy began to rage and froth with anticipation, she felt a flush from her nipples, and the two nubs became hard as coral while she slurped the primordial cock with her tongue.

At the computer console, she barely heard a familiar voice. ‘Someone is calling me,’ Keiko thought while she continued answering the strange, voiceless call to action guiding her body.

“Hi Honey. Will here. Just got the report. Bad luck about the drone. But I’m sure it will work out. Anyhow, I hope that you and Jazz are doing well. I wish you’d come up this Summer Session. I miss you both-“

With a simple hand motion from the inhuman, the radio channel turned to static. On the other end, at a receiver above the waves, Will, Keiko’s husband, tried to reestablish the communication line. ‘That’s very strange. Everything looks good here,’

Nine kilometers below the waves, Keiko found herself enamored with the strange and distinctly non-human cock. It was smooth, save for the bulbous width at the base. Even though she normally wasn’t big into cock-sucking usually, the woman worked her head up and down the blue shaft with a sense of excitement usually reserved for her research. Eventually, she felt something, like an intense flare shooting off in the night. It wasn’t her own pleasure, but that of the creature in front of her, the one she yearned to please.

The being, with the abilities of both telekinesis and telepathy among others, pulled Keiko off its tasty and now slobber-coated cock. The smooth and tall body jerked, and portions of its rigid-flesh glowed a bright blue in front of the sexy researcher. Then, the being shook as its lust flourished out the unique reproductive organ. A giant helping of slimy, translucent cum splattered Keiko’s face.

She let out a nervous chuckle while her own body radiated with a pulsing longing for more and more, which the strange creature happily provided. By the end, she looked like a pornstar, as the thick and pleasant-tasting cum slowly dribbled down her cheeks, nose, and chin. As some splashed along her heaving breasts, Keiko realized she was floating. Finally, coming to a rest on her desk, she became energized once more as she saw the thick and bulbous cock showed no signs of being depleted. The tall being bent its body over her and quickly plugged her full of the girthy length for the first time.

Keiko moaned out, grabbing onto the being’s arms and wrapping her legs around its waist while her body began undulating. Tasting the strange cock inside of her mouth was one thing, but now, her slit feasted on sensations she had never known existed. The creature from the Deep grabbed her hands forcefully, perhaps thinking she was trying to resist, which was far from the truth. Keiko let out a yelp as her wrists were slammed back down, but it ended up transforming into a lurid moan when the mysterious cock drove even deeper inside her vessel.

“Fuhhuaak... yes... fuck me... Fuck my pussy and reshape it to only enjoy you... huhurraah... your shapeeuaaah!” As her legs rubbed and remained locked around the humanoid’s body, Keiko’s moans rang out in the sound-proof office as the primordial being’s great, throbbing length dominated every inch of her squealing pussy.

A week later, Keiko's daughter Jazz was spending her lunch break with Angie. It had never been hard for Angie or anyone else to see the family relation between Jazz and Keiko. They were both tall and slender and had similar Japanese features. Keiko's daughter was eighteen and did have a sprinkle of freckles across her cheek and nose. Some pink streaks on her bangs highlighted her brown hair as well. Having learned so much about marine biology from her mother, the woman with intelligent, dark-green eyes was the youngest researcher on the URLA Station.

Angie was her close friend. An assistant nurse at twenty-two, she was fresh out of college, with blonde hair and bright green eyes. Unlike the slender and tall woman eating lunch with her, Angie's body was more on the petite side.

"Do you think it's like... some sort of midlife crisis?" Jazz inquired to her friend while she continued scooping up her food. Like her mother, Jazz sometimes let work get the better of her and almost always felt like she'd missed a meal somewhere.

"Well, that would explain the necklace, but I still don't have any clue about what she did to the wetsuit," As if she had heard them, Jazz's mother arrived. Both women tried not to look too obviously at her. The brilliant head researcher's neck supported a strange necklace. The shapes seemed to look like some sort of strange bronze metal, but neither of the two had managed to scan it yet. Beyond the necklace, Keiko had made drastic cuts to her wetsuit. The older woman's shoulders were visible, and she'd cut off some of the leggings to it almost seemed like she was wearing a wetsuit with shorts.

"If she goes out in the water with just that on, she might freeze," Angie whispered worriedly.

"Well, tonight after our shifts, we should talk with her, the rest of the staff are too afraid to get on her bad side, but something is up,"

Angie nodded to Jazz. Beyond the changes to her appearance, the nurse knew that Keiko had directed almost all of the lab's energy to searching out other caves similar to the one from a week ago. The situation wasn't too strange since the goal of the URLA was to explore, but they still hadn't recovered the damaged drone yet either.

That night, the two girls came to Keiko's room to check in on her. The heavy door opened with a hiss of hydraulics. Jazz and Angie both gasped. They were shocked to see not one but four strange beings in the room with Keiko. Jazz's mom, in particular, bounced up and down on the cock of one of the creatures.

Jazz made to shout, but she was too shocked, especially by the noises coming from her mother's naked body as the alien stretched out Keiko's hole with its incredible cock. Something stirred inside of the freckled woman's mind, and her shock at the discovery turned into desire, almost like jealousy that she hadn't gotten to try out the strange new cocks. Stepping forward, she barely heard Angie say something while she quickly shrugged out of her lab coat.

The primordial beings, not fucking Keiko, exchanged subtle glances between each other. No words were spoken, only thoughts. They marveled at their accomplishment as the new fertile female stripped out of her clothing. Using their powers, they'd ensured that anytime a woman tried to masturbate in the

structure under the water, they had become distracted. Now, Jazz's horniness was pouring out of her like heat from a geothermal vent.

"Jazz. We have to leave. This... they must have some sort of pheromone. We need masks!" Jazz turned around and gave her lovely friend a smirk. Angie trembled as she heard the door behind her close. No one had lifted a finger to engage the locks. Then Jazz stood in front of her. She reached her hands out and began stroking the nurse's shoulders.

"Jazz?"

"There is no need to worry. Our guests just want to say hello. We disturbed their home; the least you can do is greet them,"

Angie moaned out as Jazz's fingers suddenly groped and squeezed her nipples through her top. That was more than enough to begin breaking the blonde's better judgment. While she licked her lips, she noticed two of the strange beings moving in on her and Jazz.

Keiko smiled as her daughter and Angie's sexual sides revealed themselves. While the milf's pussy feasted on an incredible cock swelling inside of her, her brown eyes watched her cute daughter suck on Angie's nipples while the nurse was gripped on her hips by one of the creatures. It let out no sound as it slid its thick bulbous cock into Angie's unprotected vagina. The horny blonde cried out as she felt the humanoid's cock begin fucking her raw, without a condom, and without asking her the first question about if she was on birth control or anything.

While Angie's body began to twitch and her pussy leaked, the smooth-skinned individual behind Jazz merely looked on. It wanted to fuck Jazz and breed her, just like he'd mated with her mother, but seeing the female suck on the other's mammary glands was something novel to the creature who had spent untold years alone in the dark before the Humans had arrived.

"Mmrrawah... Mrmmm... Angie. Why didn't you tell me how good your nipples tasted?" jazz asked while moving in closer. She squeezed and tugged gently on Angie's tits and eventually worked to bring both of her nipples up to her mouth so that she could feast on both, one right after the other.

Even though the pump to her lust was engaged only in ON, the nurse blushed at the freckled girl's question.

"I didn't know. Normally, guys just kiss me and finger me. You're... you're the first one... nuaarahh... oohuah... you're the first one to taste them. Fuchukk... this cock is too big... but he just... keeps thrusting!"

"You're doing so well, especially you, Jazz. That take-charge attitude is just what we'll need in the days ahead.

"Mmrrwaahmmm... Uh... Keiko. Is... huuha... huooooaahh... is this really the best way to study a new alien race?" The question hung in the air, buoyed by more and more tantric moans from the two women being turned out by the creature's big, throbbing rods. In little time, the blonde having her nipples sucked and practically milked by her friend, found she no longer needed the answer.

'They're going to breed us. They want to have each of us get impregnated. I'm going to be the mother of a hybrid child. This is unbelievable! It will be the scientific discovery of the century!'

The humanoid seemed to pick up on her increased arousal. Before long, her body was getting fucked so hard that Jazz could barely hold onto Angie's nipples.

"Yes. Oh YES! Keep going. Keep widening out my pussy. Get me wet so I can take every inch! I want it so much! Nhrrea! Give it to meuhaah!"

Back at Headquarters, Will finally figured out a patch to fix the communication issues. When Keiko noticed that there was an incoming call, she smiled and activated the cameras of her room. The thought of being watched by her husband made her pussy tighten around the surging slab of smooth flesh being buried up to her womb. Licking her lips like a naughty slut, the Japanese woman turned to make sure that her husband could see exactly what was going on.

Her husband was shocked, to say the least. When the feed started coming, he'd only heard various moans and sensual screams. Now he was watching his wife and Angie get fucked while his naked daughter kissed the blonde on the lips. His gaze looked over to Keiko with confusion. His wife had no words for him, only blissful and shocked moans as she stroked one of the strange creatures off as the cock inside of her got closer and closer to filling up every inch of her molten folds.

The man watching the camera feed felt his cock stirring as his eyes took in every detail of the lewd and slutty perversion unfolding in front of him. His wife was being fucked by someone, and he was watching his daughter making out with a woman who was also being fucked. The shame that flooded through him became matched and overtaken by waves of lust. Alone in his office above the waves, Will quickly got out his own cock and began beating off his meet as Keiko's moans jumped up in volume.

"Uhhuaah... oh... that's it... cum... I'm cumming on top of your enormous cock! Keep going. Fuck me till your smash my womb!" Keiko cried out, her pussy gushing and squirting while her walls clung desperately to the steaming cock wedged inside of her.

The two primordial gave her a small break, letting the first woman they'd claimed catch her breath. The creature not fucking her moved out in front of her body. Reaching a finger forward, Keiko noticed that his finger didn't touch her flesh, but marks started appearing all across her body where the finger wrote.

"Yes... mark my body. Let everyone know that I'm your good little breeding slut..." The sexy head researcher moaned out deliriously. Soon, she had strange alien symbols on her tits, stomach, hips, and right above her pussy. Reaching forward, she pulled the being in front of her in for a heated kiss. Even though he had no mouth, that didn't stop her from panting and slobbering all over his smooth, featureless jaw as she felt a new surge of energy.

'This is all I want. To feel them flood my body with cum, to treat me as the woman I was born to be. Come on... keep going... give me a child!'

When Keiko started moving her hips with even more vigor, her husband reached the end of his stamina. The heat sparked out through his balls, and then he let out a manic groan before he started cumming. Of course, everything played out so fast for Will that Keiko's husband didn't even realize what was happening until it was over. When he recovered, all three girls continued sighing and moaning, and his computer and some of his monitor had become dirtied by his load. Slumping back into his chair Will noticed beads of sweat dripping down along his neck and shoulders.

“Oooohh... it’s so warm... fuhuaaakk... fucking hot! All the cum... it’s filling up every inch of my dirty pussy! Keep going. Keep going until I get pregnant! Bhuwaaaaah!” Angie screamed out. Her mind went blank, and only when she felt Jazz’s tongue and lips on her pussy did she start to feel control of her body returning. When her vision cleared, she found Jazz hovering over her. The cute woman with dark-green eyes slowly opened up her mouth, dispensing a bit of the load Angie had just enjoyed into the nurse’s mouth.

After she’d enjoyed swapping cum and spit with her friend, Jazz finally got to try out the inhuman cocks for her own. Settling her legs back on her head, she warned her new friends that she might be very tight.

“I... I’ve been working so much, that I never even got to have sex with the men around here...”

Keiko smile, thinking it was unbelievably cute how shy her daughter had become, especially after drooling out a load of cum from her mouth into Angie’s. Without speaking a word, Keiko and the alien pumping her pussy full of cock changed position so that she could settle in near her daughter. There, she began stroking and kissing Jazz’s soft-pink nipples as her womb continually shivered under the assault of the cock pounding inside of her.

Wanting to show her appreciation to Jazz, Angie moved her head forward and began licking and teasing her friend’s clit while her pussy strained to accommodate the bulbous and fat cock slamming into her cunny.

“Mmrrrwaahh...” Angie cooed out before crying out when a fresh cock slammed inside of her. “Huup! You’re ready too? Please... please use me however you like...”

As her pussy started getting ravaged all over again, she focused as much as he could on pleasuring Jazz’ most sensitive spot.

Being played with by her amorous mother and friend while a slab of throbbing meat scoured her insides soon had Jazz summersaulting through an intense orgasm. Her fingers reached out, digging into her mother’s shoulder before her entire body started spasming and becoming undone. Soon after Jazz erupted, the three aliens all ran past their limits and began painting the wombs of each horny breeding slut in their thick, inhuman sperm...

In the morning, when Keiko, Jazz, and Angie had serviced the smooth and tall creatures for who knew how long, they witnessed new examples of the strange being’s natural abilities. The muscles in their pussies, tired and sore from being fucked, suddenly felt tight as a velvet vice. The beings said no words, but through their newly forged connections, each Human slut realized that the process would help make sure the cum was not wasted. The hope was also that the process would ensure a swift impregnation. Then, it was time for the three ambassadors to return to work. As they left Keiko’s office, all three of them sported the same mysterious necklaces that Jazz and Angie had seen on the head researcher earlier...
