

THE SPECTACULAR SPIDER-MOM

WHY AM I SO
OBSESSED WITH
BABIES?

Previous Sex:
male

Current Sex:
female

**Maternal
Viability:**
optimized

**Phase 1: host
infected with
feminities.**

WHY
DO I KEEP
GIGGLING?

**Hormone
balance
altered to
pubescent
female.**

*Phase 2: begin
formation of womb
and female
reproductive system.*

*Host develops
wide,
maternal hips
to facilitate
successful
childbirth.*

*Slendered
waist
makes host
more
attractive
to male
mating
partners.*

Phase 3: host develops alveoli and milk ducts to facilitate nursing his future babies.

Breast shape and plasticity optimized to attract male attention.

Phase 5:
male sex
organ
replaced
with
female
as birth
canal
forms.

**Facial
features
softened
to
feminine
ideal.
Rear
expanded
and
rounded
for
superior
sex
appeal.**

Voice altered to female range preferred by majority of males.

I NEED A MAN!

Biological and mental parameters altered to make host "baby crazy." Will be obsessed with conceiving a child and unable to resist new urges. Host will change mannerisms and personality to please and attract alpha males.

Assessment: operation a success. Spiderman now dedicated to seeking sex until he is pregnant to the exclusion of all other priorities.

New codename: Mother-1
